THE PROJECT CODE-NAMED S.S. (SPY SHIP) BEGAN
5 DAYS LATER
OCT 13TH
STAGE ONE SEARCHING WITH A SIDE SCAN SONAR.
THE SPY BOAT BLEW ITSELF UP AND SANK

Before it touched bottom?!
You mean to say
it travelled that long a distance—
is 420 meters north of where the boat sank
After three sweeps, the only place we've found a man-made object—

They got a man-made response about 420 metres north...
Of where the spy boat sank...

If this is correct, then in the 60 seconds it took the boat to hit the bottom at a depth of 100m...
It traveled a horizontal distance four times as long as the depth!

That's the kind of the current we're dealing with.
That's the incredible strength...

Of the
ocean
current!

This current will be our biggest enemy when it's time to raise that boat.
We have to find its weaknesses immediately and at any cost!
Get information on the currents in that area from the Hydrographic and Oceanographic Department!
I want to know how it changes by the hour, by the month and by the season. Get me all the past measurements as well!
I want them to search 420 metres north of the sinking point with an ROV!
And one more thing! Contact the patrol boat "Ooshima"!
Yes, sir!

Since he turned down your job ...
The boss is at the city pool right now, welding a broken drainage grille
He's been desperate to make a little cash.

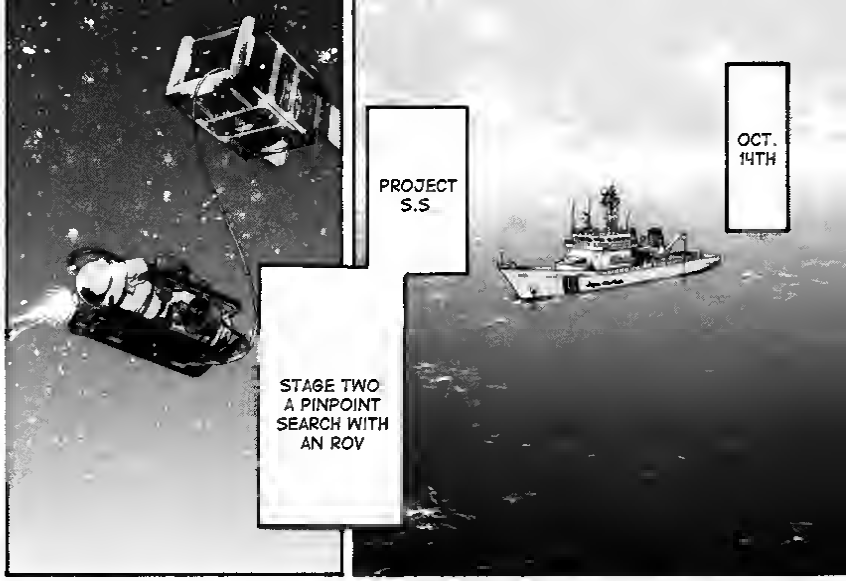
Nanba...

Yeah
She sure is fine

If we do lots of jobs like this, it'll all add up... Yeah...
It didn't pay much so it won't help with our debt, but...
.....
It's my job
It was so easy I could've done it by myself
But thanks for the help, Hiro
.....
Never mind...
.....?
Huh? Maaya-chan?
What about her?
When Mr Tagashira's granddaughter came by...
The other day...

Don't go, Rin-chan...
If you don't want to go, you don't have to...
.....
Wah!
Hiro, what's wrong with you?!



OCT. 14TH
PROJECT S.S
STAGE TWO A PINPOINT SEARCH WITH AN ROV

All we can see is marine snow.
It's been three hours since we started.

They must have been wrong!
But we can't find it!
The echo response pointed to this location
Why?!
Area 99 has been searched
Why can't we find it?!
"Ooshima" is asking for their next directive
Have the ROV turn around immediately
We'll start searching from where the ship went down...

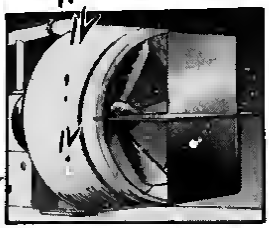
The thruster-ers?!
T-turn off

Turn off the ROV thrusters!

Yeah! Yeah!
If you do that we'll lose control and it'll start drifting!

!?
That's what I'm after!

13



!?
Mr. Kasai?!

There's something I want you to see!
Namba!
.....
...What is it?
It's footage the ROV took of the spy boat at the bottom of the sea!

I know you came all the way from Tokyo, but—
I told you we weren't getting involved in this case!
I don't want to watch anything!
Because your former buddy got shot?
.....

How petty.
I'm disappointed in you, Namba!

Petty?!
My friend got shot!
He'll never walk again!
Kakihara wanted to save people!
This only happened to him because you people sent him there, and now you have the nerve to tell me that?!

Can you still say that...
After seeing this?!
